David Koepsell

Innovation and Nanotechnology: Converging Technologies And The End of Intellectual Property
David Koepsell

This book defines 'nanowares' as the ideas and products arising out of nanotechnology. Koepsell argues that these rapidly developing new technologies demand a new approach to scientific discovery and innovation in our society. He takes established ideas from social philosophy and applies them to the nanoparticle world. In doing so he breaks down the subject into its elemental form and from there we are better able to understand how these elements fit into the construction of a more complex system of products, rules and regulations about these products.

Where existing research in the field has tended to focus on potential social harm, Koepsell takes a different tack by looking at ways in which developments in distributed design and fabrication can be harnessed to enable wealth creation by those with good ideas but no access to capital. He argues that the key challenge facing us is the error implicit in current intellectual property regimes and presents new modes of relating inventors to artifacts in this new context. In conclusion he offers contractual models which he believes encourage innovation in nano-media by embracing open source and alternative means of protection for innovators.

From reader reviews:

Jacqueline Gore:

Reading a guide tends to be new life style on this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Having book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. Many author can inspire their own reader with their story as well as their experience. Not only the story that share in the guides. But also they write about the information about something that you need instance. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on this planet always try to improve their proficiency in writing, they also doing some study before they write on their book. One of them is this Innovation and Nanotechnology: Converging Technologies And The End of Intellectual Property.

Ellen Jorge:

As we know that book is important thing to add our information for everything. By a e-book we can know everything you want. A book is a pair of written, printed, illustrated or even blank sheet. Every year was exactly added. This reserve Innovation and Nanotechnology: Converging Technologies And The End of Intellectual Property was filled in relation to science. Spend your time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading any book. If you know how big benefit of a book, you can feel enjoy to read a publication. In the modern era like today, many ways to get book that you simply wanted.

Kristopher Sutherland:

That reserve can make you to feel relax. This kind of book Innovation and Nanotechnology: Converging Technologies And The End of Intellectual Property was vibrant and of course has pictures around. As we know that book Innovation and Nanotechnology: Converging Technologies And The End of Intellectual Property has many kinds or category. Start from kids until teenagers. For example Naruto or Detective Conan you can read and think that you are the character on there. Therefore , not at all of book are make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book in your case and try to like reading in which.

Danny Padilla:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from a book. Book is created or printed or illustrated from each source in which filled update of news. In this particular modern era like right now, many ways to get information are available for a person. From media social like newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just searching for the Innovation and Nanotechnology: Converging Technologies And The End of Intellectual Property when you necessary it?
