Intelligent Virtual World: Technologies and Applications in Distributed Virtual Environment

Intelligent Virtual World: Technologies and Applications in Distributed Virtual Environment
There has been an explosive growth in multimedia computing, communication and applications. This revolution is transforming the way people live, work and interact with each other, and is impacting the way business, government services, education, entertainment and health care operate. This title summarizes recent research topics, focusing on four major areas: intelligent content-based information retrieval and virtual world; quality-of-services of multimedia data; intelligent techniques for distance education; and intelligent agents for e-commerce.
