Epilepsy: Global Issues for the Practicing Neurologist (World Federation of Neurology Seminars in Clinical Neurology) Jerome Engel MD PhD

This volume is the second in a series developed under the auspices of the World Federation of Neurology to meet the needs of neurologists who must practice medicine without many of the advantages that are often taken for granted in the industrialized world. It is targeted to neurologists practicing in low-resource environments and those who wish to practice cost-effective neurology, and addresses issues important for neurologists in developing countries that are not covered in standard textbooks. The series will update the reader in currently accepted diagnostic and management practice. Material is presented in a user-friendly, interactive manner, with abundant case material.

Epilepsy is one of the most common serious primary brain disorders, affecting forty million people worldwide. According to the World Health Organization, epilepsy accounts for 1% of the Global Burden of Disease, equivalent to lung cancer in men and to breast cancer in women. It is not surprising, therefore, that ten to twenty texts on epilepsy are published annually. These texts contain the very latest information on diagnosis and treatment of various aspects of epilepsy however, approximately 80% of people with epilepsy in the world live in developing countries, where modern diagnostic and treatment approaches do not exist. Upwards of 90% of people with epilepsy in these areas receive no treatment at all. This is the first text to address the issues faced by neurologists who must deliver care with limited resources, often in a setting of tropical diseases and malnutrition, that characterize practice in developing countries."

It should be here for anyone. So , don't miss it! Just read this e-book kind for your better life as well as knowledge.

Ian Bracy:

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or even make summary for some book, they are complained. Just small students that has reading's heart or real their pastime. They just do what the trainer want, like asked to the library. They go to at this time there but

nothing reading significantly. Any students feel that looking at is not important, boring as well as can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Epilepsy: Global Issues for the Practicing Neurologist (World Federation of Neurology Seminars in Clinical Neurology) can make you sense more interested to read.
