Binding Theory (Cambridge Textbooks in Linguistics) Daniel Büring
This study explores how different kinds of nominal expressions such as names, noun phrases and pronouns develop anaphoric relations among each another that have reference to physical elements. Providing a thorough and comprehensive introduction to modern binding theory, this book introduces a variety of nominal and, especially, pronominal expressions from the world's languages. Including numerous exercises and examples, the textbook will be invaluable to graduate and advanced undergraduate students of syntax and semantics.
