Grade 5 Math by Design

Russell F. Jacobs

Grade 5 Math by Design Russell F. Jacobs
This book employs a search-and-shade technique. Students work the exercises and search for the answers on a grid. Each square containing an answer is shaded according to a shading code shown for that exercise. If the answers are correct and the grid is shaded correctly, a pleasing design emerges. Students are highly motivated by this connection between math and art. Teachers are given permission to reproduce the pages of all our "design" books for classroom use. A solution key is provided. Covers: Addition, subtraction, multiplication, division of whole numbers ; Word problems using whole numbers and the four basic operations ; Order of operations using whole numbers ; Mental computation using whole numbers and simple fractions ; Finding next number in a sequence of whole numbers ; Identifying greatest number in a list of fractions ; Four basic operations with fractions ; Four basic operations with decimals ; Word problems with fractions and decimals ; Writing a fraction or decimal as a percent ; Writing a fraction or mixed number as a decimal ; Evaluating an expression of one variable ; Writing an expression from a verbal description ; Solving for the unknown in a simple equation ; Writing and solving an equation from a verbal statement ; Writing ordered pairs for points on a grid ; Finding values from a straight line graph ; Work with simple geometric figures ; Measurement ; Probability
