Psychopaths Carol A. Reimer
A psychopath presents what appears to be a very loving and caring 'persona'. As a result, victims will sometimes feel they were wrong about their own feelings and that they misinterpreted the 'abuse' received from a suspected psychopath. Just as the victim rationalizes and justifies the mistreatment - further abuse is delivered. Victims are left not knowing what to expect next. Unpredictable and uncontrollable stress is generated that has the ability to wear them down and impact their physical and mental health. The potential for added physical complications exists because victims are often in weakened states, leaving their bodies unable to resist sickness and disease. Sadly, once an individual is no longer of use to the psychopath, it's common for that person to be discarded. The 'victim' will experience feelings of disbelief, anger, being used and worthlessness. They will often suffer a major depression. None of this information concerning the psychopath and his/her victims is unique - it's all out there and may be found in other publications, articles, videos, etc. However, author Reimer has taken this serious societal problem beyond the scope of most writers. Those infected with the Archon virus, approximately 4% of society, hate humanity - yours and their own. They are a dangerous fanatical sub-species operating at various levels in the human community and are responsible for the terror and disruption in the World. They must be exposed and stopped. Surprisingly, mainstream knows very little about this disorder, and if they do, they think only in terms of violent 'psychopathy' - murderers, serial killers, sex offenders, etc. - people who have conspicuously broken the law and who, if caught, will be imprisoned, or even put to death by our legal system. They aren't aware that psychopaths are also those we love and trust in our most intimate relationships; individuals our legal system usually doesn't punish. We just don't identify with the larger number of nonviolent psychopaths, socio-paths, and narcissistic people among us because 'they' aren't blatant lawbreakers. Obviously there is a huge difference between violent psychopaths and those who haven't committed any violence - at least not yet. Much depends on the individual's environment, social status, and the level of the disease. How badly are they damaged? Do those who desire 'help' still have a chance? There is a great deal of discussion regarding the cause, detection, and cure of the illness, which has now been identified as 'Psychopathy'. Mainstream is gradually becoming aware of the virus-infected psychopaths running the World. These 'sickies' hold authoritative positions in government, corporations, military, academia, medical, pharmaceutical, media, science (transhumansim, nano-technology, MONSANTO GMO crops) and many other areas of society. What they will do or how far they will go depends on how mentally damaged they are. Most have crossed the Rubicon. Is it possible to determine if an individual has leanings towards violent behavior? Unfortunately, there aren't too many roadmaps. An individual is diagnosed only after committing a violent act. Astrology indicates violent tendencies, but doesn't determine if an individual is psychopathic. MRI scans have uncovered new information about psychopathy as the scans show activity in certain areas of the brain that are indicators of abnormalities. Author Reimer has endeavored to connect the dots that illustrate tactics the Archon-infected psychopaths are using to create turmoil and destruction worldwide. Each chapter unfolds a major issue: the origin of the psychopathic virus; who were originally infected; where it may be hiding in the brain; 'white genocide'; nanotechnology, violated DNA, the Ebola pandemic, Monsanto GMO crops, the 'pale horse', return of Nachash, and perhaps the most riveting theory put in print - the real reason she believes may be promoting the Archon invasion of human minds.
