The Western Heritage, Volume II: Since 1648 (7th Edition) Donald Kagan, Steven Ozment, Frank M. Turner

Written by leading scholars in the field, this survey of Western Civilization presents a strong, clear narrative account of the central developments in Western history with a focus on several key themes--the development of political freedom and constitutional government; the shifting relations among religion, society, and the state; the development of science and technology and their impact on thought and social institutions; and the major religious and intellectual currents that have shaped Western culture. Covers Western civilization--from England and France in the Seventeenth Century, to the collapse of European Communism and beyond. Highlight features include: *Art and the West* sections that highlight pieces of art and artists who were prominent during specific time periods; *The West and World* (series of illustrated essays that compares Western social or political institutions with those of non-Western cultures at particular times in history); *primary source documents* that offer a glimpse of the thoughts of historical figures as well as the words of ordinary people at a particular time in history; and *Timelines* of the political and social developments in specific historical periods. For anyone interested in Western Civilization and European History and Civilization.
