Pioneer Work in Opening the Medical Profession to Women Elizabeth Blackwell
"Dr. Elizabeth Blackwell was the first woman ever educated in an American medical school. This is a story of success by perseverance and personal sacrifice. She has no funding: she goes on. She has no mentors: she goes alone. She has no money for a cab: she walks. She wears out her shoes and avoids places where she can't look shabby. She loses an eye, and gives up her dream of being a surgeon, embracing general medicine instead. She endures insults, humiliation, and profound loneliness. But she believes she is making a future possible for American women doctors, so nothing, nothing stands in her way for long. And I thought medical school was hard! The old farts who harassed us women med students in the 1980's could only dream of tormenting us like 19th century gentlemen tormented her. I would love to be able to thank her, both for making life better for women, and for her beautifully written and amazingly upbeat book about breaking the bonds. " - Amazon Reviewer
