A New and Simple Theory of Gravity

Donald E. Tyler

A New and Simple Theory of Gravity Donald E. Tyler
The cause of gravitation is explained by analysis of Coulomb's Law: like charges repel, unlike charges attract, and the strength of the attraction or repulsion is inversely proportional to the square of the distance. The nuclear force and gravitation are simply manifestations of the electrostatic force. Explained is the reason no atomic nucleus has more than 92 protons, and no nucleus (in spite of the alleged nuclear force) has 2 protons without a neutron to hold them together. The expanding universe is explained without a "big bang." Recent observations indicating the presence of antigravity (Science 279:651,Jan 1998; Business Week p.113, Mar 16, 1998) was anticipated and is strong evidence of the truth of the presented theory.
