Mysticism, Physics, Polarity and Mother Earth Helmut W. Werner
In his book, the author, a physicist with more than 30 years experience in an International Research Centre, describes and analyses his "travels" in another reality, i.e. experiences in a not-everyday plane of consciousness. They are called "holotropic" i.e. aiming towards the "Whole" and are in part comparable with near-death experiences and spontaneously occurred again and again (without the use of drugs!). The struggle between the author's "physics conscience" and the recollections of that other reality is the theme that recurs throughout the book. Topics that are discussed include: *Creation, the Big Bang and the Higgs field *The position of women in the Bible and in contemporary society * Trinity, a concept common to all religions *Is God male or female, or...? A new view of God *Religion, Spirituality and Science *Space, Time and Matter. Physics and Mysticism. What is real? *Polarity, the driving force for all events on earth *Archetypes: Fertility, the Great Mother, Gaia and the New Energy *The global crisis: Imbalance between nature and technology; Egoism versus Altruism. By reading this book with the heart, the overwhelming beauty of the "higher worlds" will open step by step and the reader will behold the infinite splendour of eternal BEING.
