The Collected Papers of Bertrand Russell, Volume 5: Toward Principia Mathematica, 1905-08
Bertrand Russell

This volume of Bertrand Russell's *Collected Papers* finds Russell focused on writing *Principia Mathematica* during 1905–08. Eight previously unpublished papers shed light on his different versions of a substitutional theory of logic, with its elimination of classes and relations, during 1905-06. A recurring issue for him was whether a type hierarchy had to be part of a substitutional theory. In mid-1907 he began writing up the final version of *Principia*, now using a ramified theory of types, and eleven unpublished drafts from 1907-08 deal with this. Numerous letters show his thoughts on the process.

The volume's 80-page introduction covers the evolution of his logic from 1896 until 1909, when volume I of *Principia* went to the printer.
