What is time? It is a mystery to both scientist and philosopher alike. Wouldn't it be great if we could shake off the shackles of time that keep us prisoner in the here and now? Wouldn't you love to be able to visit the past or the future?

We don't know if time travel is really possible, but throughout the centuries there have been those who say that they know the secret of time and that with the proper training, it is possible to send ones mind across time and space.

We have long been taught that time travel is impossible and the work of science fiction. But government insiders have leaked information stating that secret agencies with the U.S. military have been experimenting with technology capable of sending a person into the past and future...often with mind-blowing results.

Here is the shattering evidence that we are being visited by 'time surfers' from the future, disguised as extraterrestrial UFOs. Also find out about the mystery of Time-Slips and how some people have accidentally caught glimpses of the past and even the future.
